

## Advanced Photonic Sciences Named as Exclusive Distributor For Lasertack GmbH in North America

June 11, 2018 - Advanced Photonic Sciences announced today that the company has signed an exclusive distributor agreement with Lasertack New Laser Generation of Kassel, Germany, covering the United States of America and Canada. Lasertack offers an innovative line of laser diodes, laser diode Micro-Modules, and high power blue (445 nm) laser diode products that offer direct or fiber-coupled high brightness output up to 50 W. The high powered 445 nm sources are ideal for:

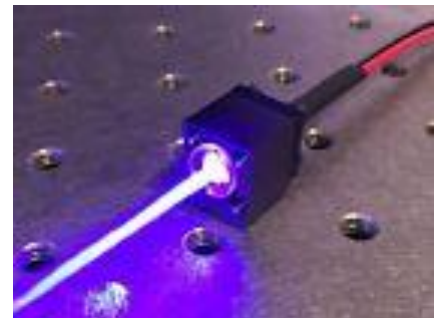

- High Power Blue Diode Laser Engraving
- High Power Blue Pumping of Solid-State Lasers Like Ti:Sapphire
- High Power Blue Laser Marking
- High Power Blue Laser Cutting
- High Power Blue Illumination For Drones, Light Shows, and Military Applications

**LE-445-6000-SC 6.0 W Blue 445 nm Engraving, Cutting, and Marking Laser**

**FCLD-445-20-50, 20 Watt, 50 Watt, 445 nm Fiber-Coupled Blue Diode Lasers For Engraving, Marking, Cutting**

**Diode Micro-Module: Available Diode Laser Wavelengths From 375 nm to 1064 nm, CW Powers From 5 mW to 3 W**

For information regarding any of these laser products please contact Sten Tornegård at [info@advancedphotonicsciences.com](mailto:info@advancedphotonicsciences.com).
